

EU EARLY ALERT - PESTICIDE REVIEW

September 7, 2023

The information presented in this document provides interested stakeholders with advance notice of active ingredients under review for renewal of approval in the EU and highlights which substances that have **expired**, are expected to **expire**, may have **restricted renewal** or **non-renewal of approval**. The green arrows reflect where a substance is in the EU review process as of **August 31, 2023**.

In the European Union active ingredients must be reviewed every 10-15 years. The review process takes three or more years to complete. Registrants must submit an application for renewal no later than thirty-six months prior to the expiration date. The figure below highlights the general timeline between the main steps of the process. During these reviews, substances are checked against EU cut off criteria. Triggering the cut off criteria is likely to result in the removal of the pesticide from use in the EU. It can also result in the elimination of the associated MRLs.

The pesticide review process monitored here is different from the MRL review process (Article 12 Reviews). MRL-specific reviews are notified on a rolling basis according to the schedule shared at the end of this report.

APPLICATION FOR RENEWAL – EXPECTED TO EXPIRE (Up to August 2024)

Chemical companies must support the review of their substance. If they do not, the active ingredient will automatically expire in the EU on a set date. For the substances below, registrants **have not submitted the application** for renewal of approval or **have withdrawn the application** and **approval will expire**. Corresponding MRLs may be affected. The substance’s expiration date is outlined in parentheses.

- **Bacillus firmus I-1582*** (September 30, 2023)
- **Spiromesifen** (September 30, 2023)
- **Quizalofop-P** (November 30, 2023)
- **Spirotetramat** (April 30, 2024)
- **Ascorbic acid*** (June 30, 2024)
- **Spinetoram** (June 30, 2024)
- **Flubendiamide** (August 31, 2024)

APPLICATION FOR RENEWAL - EXPIRED (September 2022 – August 2023)

Substances in this section **have already expired** due to **non-submission of application for renewal** or **withdrawal of application for renewal**. This list includes substances that have expired in the last year. Corresponding MRLs may be affected. Expiration date is outlined in parentheses.

- **Fatty acids C8-C10 methyl esters*** (August 31, 2023)

**Substance is exempted from a tolerance in the United States*

EU EARLY ALERT - PESTICIDE REVIEW

September 7, 2023

UP NEXT FOR REVIEW (Up to August 2024)

Under the EU pesticide review program, the substances listed in this section are scheduled to go through the periodic review process. They have **upcoming deadlines for the submission of the application for renewal**.

- **Cyantranilprole** (September 14, 2023)
- **Isofetamid** (September 15, 2023)
- **Oxathiapiprolin** (March 3, 2024)
- **Bacillus amyloliquefaciens MBI 600*** (September 16, 2023)

STANDING COMMITTEE ON PLANTS, ANIMALS, FOOD AND FEED (SCoPAFF)

Based on the European Food Safety Authority (EFSA) conclusions, the European Commission has proposed the substances in this section for **non-renewal** or **restricted renewal**. They are now **under consideration** by the Standing Committee on Plants, Animals, Food and Feed (SCoPAFF) as available in the **July 11-12 and September 15, 2023**, meeting agendas. Drafts are first presented for discussion and subsequently for a vote by the Committee. Draft proposals may be notified to the World Trade Organization (WTO) prior to the Committee's final vote. In these cases, substances are listed below and in the next section.

Drafts presented for discussion

- **Captan**
- **Triflurosulfuron-methyl**
- **S-metolachlor**
- **Clofentezine**
- **Metiram**

WTO NOTIFICATION (September 2022 – August 2023)

The substances in this section have been notified to the **WTO as proposed for non-renewal or restricted renewal**. After the comment period, the Commission will analyze the comments received and publish the Implementing Regulation. Notification date is outlined in parentheses (). Please refer to the draft Commission Regulation for the full explanation of the justification for the restricted or non-renewal of approval.

Proposed non-renewal

Clofentezine: proposed non-renewal based on multiple concerns, including endocrine disrupting properties that may cause adverse effects in humans. Clofentezine is also seen as a high, long-term risk to birds and wild mammals. (July 14, 2023)

Metiram: proposed non-renewal based on various concerns, including meeting the criteria for endocrine disruption for humans, exposure to the active ingredient exceeds the reference values, and is a high risk to aquatic organisms and non-target arthropods. (July 20, 2023)

S-metolachlor: proposed non-renewal based on multiple concerns, including contamination of groundwater risk for earthworm-eating mammals. (May 31, 2023)

Proposed restricted renewal

Captan: proposed restricted renewal of approval to permanent greenhouse use only. (September 28, 2022)

COMMISSION IMPLEMENTING REGULATION (September 2022 – August 2023)

The Commission has published the final decision on non-renewal or restricted renewal in the EU for the substances in this section. **EU MRLs may be subject to change as a result.** Implementing regulation publication date is outlined in parentheses (). Please refer to the published Commission Regulation for the full explanation of the justification for the restricted or non-renewal of approval.

Non-renewal

Benfluralin: non-renewal based on long-term risk to birds and mammals including the risk from secondary poisoning of earthworm eating birds and mammals, as well as the genotoxic potential of an impurity could not be excluded. (January 23, 2023)

Oxamyl: non-renewal of approval due to high risk for all the representative uses assessed to exceed the acceptable operator exposure level, exceedance of the acute reference dose, others. (April 5, 2023)

Ipconazole: withdrawal of approval due to high long-term risk to birds and classification as toxic for reproduction category 1B. (May 10, 2023)

Restricted renewal

Abamectin: restricted renewal to greenhouse use based on high risk identified to aquatic organisms and wild terrestrial non-target organisms, others. (March 8, 2023)

Penflufen: restricted renewal due to a classification in carcinogen category 2 and the presence of the metabolite M01 for groundwater. (September 5, 2022)

MRL CHANGES (September 2022 – August 2023)

As a **result of non-renewal** or **expiration of approval**, restrictive MRLs have either been proposed (WTO notification) or implemented (Commission Regulation) for the substances below.

WTO Notification:

- **Bifenazate:** WTO notification G/SPS/N/EU/609. (January 17, 2023)
- **Carboxin:** WTO notification G/SPS/N/EU/616. (February 23, 2023)
- **Diuron:** WTO notification G/SPS/N/EU/617. (February 24, 2023)
- **Ettoxazole:** WTO notification G/SPS/N/EU/617. (February 24, 2023)
- **Sodium hypochlorite*:** WTO notification G/SPS/N/EU/642. (June 13, 2023)
- **Indoxacarb:** WTO notification G/SPS/N/EU/653. (July 7, 2023)
- **Desmedipham:** WTO notification G/SPS/N/EU/654. (July 7, 2023)
- **Etridiazole:** WTO notification G/SPS/N/EU/654. (July 7, 2023)

MRL CHANGES *(continued)*

As a **result of non-renewal** or **expiration of approval**, restrictive MRLs have either been proposed (WTO notification) or implemented (Commission Regulation) for the substances below.

Import tolerances and/or some Codex MRLs were proposed to be maintained for the following substance(s):

- **Methomyl:** WTO notification G/SPS/N/EU/617. (February 24, 2023)
- **Famoxadone:** WTO notification G/SPS/N/EU/642. (June 13, 2023)
- **Flutriafol:** WTO notification G/SPS/N/EU/649. (June 29, 2023)

Implementing Regulation:

- **Cyromazine:** Commission Regulation 2023/147 on January 20, 2023. *Effective date: June 20, 2023*
- **Bromoxynil:** Commission Regulation 2023/128 on January 19, 2023. *Effective date: August 8, 2023*
- **Chlorsulfuron:** Commission Regulation 2023/128 on January 19, 2023. *Effective date: August 8, 2023*
- **Clothianidin:** Commission Regulation 2023/334 on February 15, 2023. *Effective date: March 7, 2026*
- **Thiamethoxam:** Commission Regulation 2023/334 on February 15, 2023. *Effective date: March 7, 2026*
- **Sodium aluminum silicate:** Commission Regulation 2023/377 on February 22, 2023. *Effective date: September 14, 2023*
- **Triadimenol:** Commission Regulation 2023/377 on February 22, 2023. *Effective date: September 14, 2023*
- **Imazaquin:** Commission Regulation 2023/710 on March 30, 2023. *Effective date: October 21, 2023*
- **Phosmet:** Commission Regulation 2023/1029 on May 25, 2023. *Effective date: September 15, 2023*

Import tolerances and/or some Codex MRLs were maintained for the following substance:

- **Cyfluthrin:** Commission Regulation 2023/173 on January 27, 2023. *Effective date: August 16, 2023*
- **Beta Cyfluthrin:** Commission Regulation 2023/173 on January 27, 2023. *Effective date: August 16, 2023*
